It is expressed retroactively as a percentage of average sub-fund assets and has been calculated in accordance with the Asset Management Association Switzerland (“AMAS”) guidelines on the calculation and disclosure of the TER of collective investment schemes. Any reimbursements/commissions for client unit holdings from target funds have been credited to the sub-fund and thus reduce the TER.

Tracking error

Realised tracking error is the annualised standard deviation of the difference in monthly returns between a sub-fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time.

Investment techniques, efficient portfolio management techniques including securities lending and transaction costs from rebalancing can have an impact on tracking error as well as the return differential between a sub-fund and its benchmark index. Importantly, these impacts can be either positive or negative depending on the underlying circumstances. Investment techniques include cash management, currency hedging, futures held and sampling techniques.

In addition to the above, the sub-funds may also have a tracking error due to withholding tax suffered by the sub-funds on any income received from its investments. The level and quantum of tracking error arising due to withholding taxes depends on various factors such as any reclaims filed on behalf of the sub-funds with various tax authorities, any benefits obtained by the sub-funds under a tax treaty or any securities lending, activities carried out by the sub-funds.

The following table shows the actual realised tracking error of the sub-funds as at 30 November 2025. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

NOTES TO THE INTERIM REPORT

1. SALES RESTRICTIONS UNITED STATES OF AMERICA (“USA”)

Units of the sub-funds may not be offered, sold or delivered within the United States (“US”). Units of this collective investment scheme may not be offered, sold or delivered to citizens and/or residents of the USA and/or persons or entities whose income and/or revenue, irrespective of source, is subject to US income tax, including those deemed to be US persons under Regulation S of the US Securities Act of 1933 and/or the US Commodity Exchange Act, as amended.

2. INFORMATION RELATING TO THE AMAS TRANSPARENCY PROVISIONS

The Fund Management Company and its agents do not pay any retrocessions to third parties mandated to promote the sale of their collective investment schemes. In respect of the sale of collective investment schemes, the Fund Management Company and its agents do not pay any rebates to reduce the fees or costs incurred by the investor and charged to the sub-fund.

3. SOFT COMMISSIONS

The Fund Management Company has not concluded any commission sharing agreements or agreements in respect of “soft commissions”.

4. VALUATION OF THE FUND’S ASSETS AND ITS UNITS

a) The NAV of each sub-fund is calculated in Swiss francs at the market value as of the end of the financial period and for each day on which units are issued or redeemed. The sub-fund’s assets will not be calculated on days when the stock exchanges/markets in the main investment countries of the sub-fund concerned are closed (e.g. bank and stock exchange holidays).

b) Securities traded on a stock exchange or another regulated market open to the public shall be valued at the closing prices of the main market on the order day. Other investments or investments for which no current market value is available shall be valued at the price which would probably be obtained in a diligent sale at the time of the valuation. In such cases, the Fund Management Company shall use appropriate and recognised valuation models and principles to determine the market value.

c) The NAV of a unit of a sub-fund is determined by the market value of that sub-fund’s assets, minus all that sub-fund’s liabilities, divided by the number of units of that sub-fund in issue. It will be rounded to four places after the decimal point of the unit of account.

NOTES TO THE INTERIM REPORT (continued)

5. VALUATION OF INVESTMENTS (continued)

In accordance with Article 84 paragraph 2 Ordinance of the Swiss Financial Market Supervisory Authority ("FINMA") on Collective Investment Schemes, the investments of the sub-funds are to be summarised in a table according to the following three valuation categories:

Level 1 – trading of investments listed in a stock exchange or in another regulated market open to the public and valued according to the prices in the primary market;

Level 2 – investments that are not priced according to level 1 whose value is based on market-observed parameters;

Level 3 – investments whose value cannot be based on market-observed parameters and are valued with suitable valuation models taking account of the current market circumstances.

The determination of what constitutes market-observed parameters requires significant judgement by the Fund Management Company taking into consideration factors specific to the asset or liability.

The Fund Management Company considers prices in the primary market to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

6. OFF-BALANCE-SHEET BUSINESS

a) Securities Lending

The security lending agent appointed pursuant to the securities lending agreement is BlackRock Advisors (UK) Limited. The sub-funds benefit from a borrower default indemnity provided by BlackRock, Inc. The indemnity allows for full replacement of securities loaned. BlackRock, Inc. bears all operational costs directly related to securities loan transactions as well as the cost of indemnification against borrower default. During the period the sub-funds engaged in securities lending. The sub-fund receives either cash collateral or securities as collateral, as determined, for a value in excess of the market value of the securities loaned.

Securities lending income is split between the sub-fund and the securities lending agent in a ratio of 62.5:37.5 in favor of the sub-fund, with all operational costs borne out of the securities lending agents share.

The securities lending borrowers that received securities on loan during the period included: Barclays Capital Securities Limited, BNP Paribas Arbitrage, Citigroup Global Markets Limited, Goldman Sachs International, HSBC Bank PLC, Jefferies International Limited, JP Morgan Securities PLC, Macquarie Bank Limited, Morgan Stanley & Co. International PLC, Société Générale Paris and UBS AG. The collateral administrators are Bank of New York Europe and JP Morgan Chase Bank.

The following table details the value of securities on loan as the percentage of lendable assets, as the percentage of the NAV, and the income from securities lending for the period ended 30 November 2025. The total value of the lendable assets is equal to the aggregate value of the securities eligible for the securities lending program. This excludes any assets held by the sub-funds that are not considered lendable due to any market, regulatory, investment or other restrictions.
