Investment strategy

The fund's investment strategy is based on a series of decisions designed to exploit investment opportunities taking into account the following aspects: duration of the negotiable debt securities, interest differential between the Euribor (or similar) and the €STR, fluctuations in the capitalised €STR over the course of the month, credit risk. Therefore, the management company has set exclusions in three areas: regulatory, sector-specific and norms-based exclusions. In addition to incorporating specific exclusions, the fund's investment process is based on an approach designed to improve its ESG rating.
