## WHAT IS THIS PRODUCT?

#### Type

Pictet - EUR High Yield is a Fund of an open-ended investment company with variable capital ("SICAV") with segregated liability between Funds and is authorised as an Undertaking for Collective Investment Transferable Securities ("UCITS") in Luxembourg.

#### Term

This product has no maturity date. The Fund is formed for an indefinite period. However, the Board of Directors may in certain cases decide to close the Fund or at any time propose to close the Fund at an extraordinary general Shareholders' meeting. Dividend distribution policy: Accumulated. You may redeem your investment upon demand. Dealing frequency: Daily. It is also a hedged share class, which means that it is designed to reduce, but not cancel out, the currency risk between the Fund currency and the Share Class currency.

## **Objectives**

To increase the value of your investment, through income and investment growth.

## Reference Index

ICE BofA Euro High Yield Constrained (EUR). Used for portfolio composition, risk monitoring, performance objective and performance measurement.

## **Portfolio Assets**

The Fund invests at least two-thirds of its assets in high-yield bonds, including convertible bonds, that are mostly denominated in euro (EUR). The Fund invests worldwide, including emerging markets, and can invest across any sector. The Fund may also invest in money market instruments.

## **Derivatives and Structured Products**

The Fund may use derivatives to reduce various risks (hedging) and for efficient portfolio management, and may use structured products to gain exposure to portfolio assets.

## **Fund Currency**

**EUR** 

#### **Investment Process**

In actively managing the Fund, the Investment Manager uses a combination of market and issuer analysis to build a diversified portfolio of securities it believes offer the best risk-adjusted returns relative to the benchmark. The Fund's management approach uses strict risk controls. The Investment Manager considers ESG factors a core element of its strategy by adopting a tilted approach which seeks to increase the weight of securities with low sustainability risks and/or to decrease the weight of securities with high sustainability risks, subject to good governance practices. Activities that adversely affect society or the environment are also avoided. There may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy\*, SFDR product category Article 8. The performance of the Fund is likely to be significantly different from that of the benchmark, because the Investment Manager has significant discretion to deviate from its securities and weightings.
