## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

**Be aware of currency risk.** In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

- Credit risk

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of the Fund.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## What are the costs?

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

- CHF 10 000 is invested

Costs over Time	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	668 CHF	872 CHF
<b>Annual cost impact (*)</b>	6.7%	3.3% each year

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
