Competent Authority:	The Commission de Surveillance du Secteur Financier (CSSF) is in charge of the control of Candriam with regard to this key information document. . This product is authorised in Luxembourg. Candriam is approved in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

This key information document is valid as at 2026-02-18.

WHAT IS THIS PRODUCT?

Type: This product is a share class (I) of a sub-fund (Robotics & Innovative Technology) of an investment company with variable capital (SICAV) under Luxembourg law (Candriam Equities L), Undertakings for Collective Investment in Transferable Securities (UCITS).

Term: Open-ended.

Objectives:

Principal assets traded: Shares of companies considered to be well positioned to take advantage of developments in technological innovations and having their head office and/or the majority of their business around the world.

Investment strategy:

The fund seeks to achieve capital growth by investing in the principal assets traded.

The management team makes discretionary investment choices based on economic/financial analyses. This fund is a high conviction fund: the management of the fund is based on a rigorous selection of a limited number of equities of any capitalisation.

There are two cornerstones in the selection of companies: a thematic selection and a fundamental analysis:

- The thematic selection seeks to only accept companies considered to be sufficiently exposed to one or more sub-themes of robotics and new technologies; and
- The fundamental analysis selects the companies scoring the highest in five criteria: quality of management, growth potential, competitive advantage, value creation and level of indebtedness.

The Fund promotes, among other characteristics, environmental and/or social characteristics without however having a sustainable investment objective. Environmental, social and governance (ESG) criteria contribute to the manager's decision-making, without however being a decisive factor in this decision-making.

For more information, please see the management company's website and/or the prospectus.

The fund may use derivative products both for investment and hedging purposes (hedging against unfavourable future financial events).

Benchmark: MSCI World (Net Return). The fund is actively managed and the investment process implies referring to a benchmark index. Definition of the index: The index measures the performance of the mid and large cap segment in countries with developed markets. Use of the index: - as an investment universe. In general, most of the financial instruments in the sub-fund are part of the index. However, investments outside this index are authorised, - in determining risk levels/risk parameters. Since the fund is actively managed, it does not have the goal of investing in all components of the index, nor that of investing in the same proportions as the components of this index. In normal market conditions, the expected tracking error of the fund will be significant, i.e. above 4%. This measurement is an estimate of the performance gap between the fund and its benchmark index. The greater the tracking error, the greater the deviations from the benchmark index. The actual tracking error depends in particular on market conditions (volatility and correlations between financial instruments) and may therefore deviate from the tracking error expected.

Repayment of shares: On demand, every day, at Luxembourg.

Allocation of income: Reinvestment.

Intended retail investor:

This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience who are looking for Capital Growth. This product can be used as a core holding or a component of a diversified portfolio for investments with an investment horizon of 6 years. Investors should understand the product risks and only invest if they can bear potentially substantial losses.

General information:

Depositary bank: CACEIS Bank, Luxembourg Branch.

Other information:

This document provides a description of a share class of a sub-fund of Candriam Equities L. The prospectus and periodical reports are established for all the sub-funds. There are other share classes and these are listed in the prospectus.

Investors may apply for the conversion of their shares into shares of another class of the same sub-fund or into shares of a class of another sub-fund of the fund, based on the eligibility criteria and following the procedures available through their financial intermediary.

The sub-fund is only liable for the debts, liabilities and obligations that can be charged to it.

Additional information about the fund can be found in the prospectus and the periodical reports, which may be obtained free of charge on request from Candriam or viewed at any time on the website www.candriam.com. These documents are available in one of the languages approved by the local authority of each country where the fund is authorised to market its shares or in a common language in the international finance sphere. All other practical information, in particular the latest share price, is available from the places shown above.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 6 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

Be aware of the currency risk. If your reference currency is different from the product's currency, the yield of your investment will also be influenced by fluctuations, both up and down, in the exchange rate between these two currencies. In this case, the risk indicator above does not in fact take account of the fluctuations between these two currencies.

Other risk(s) materially relevant not included in the summary risk indicator: Derivatives. Liquidity. Concentration. Sustainability.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and/or a suitable benchmark over the last 11 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 07/2024 and 12/2025.

Moderate: This type of scenario occurred for an investment between 07/2018 and 06/2024.

Favourable: This type of scenario occurred for an investment between 01/2016 and 12/2021.

Recommended holding period: Example Investment:		6 years 10 000 USD	
		If you exit after 1 year	If you exit after 6 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	2 720 USD	1 640 USD
	Average return each year	- 72.80%	- 26.01%
Unfavourable	What you might get back after costs	6 690 USD	12 080 USD
	Average return each year	- 33.10%	3.20%
Moderate	What you might get back after costs	11 880 USD	23 170 USD
	Average return each year	18.79%	15.03%
Favourable	What you might get back after costs	18 010 USD	32 330 USD
	Average return each year	80.08%	21.60%

WHAT HAPPENS IF CANDRIAM IS UNABLE TO PAY OUT?

As the Funds' assets are held with the depositary, they are not part of the assets of Candriam in case of bankruptcy and cannot be seized by the creditors of Candriam. Nevertheless, investors run the risk to suffer a financial loss in case of the default of Candriam.

In case of default of the depositary, the risk of a financial loss is mitigated to some extent as the Fund's assets are legally segregated from the assets of the depositary.

The potential financial loss associated with the default of Candriam is not covered by an investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

	If you exit after 1 year	If you exit after 6 years
Total costs	103 USD	1 470 USD
Annual cost impact (*)	1.0%	1.2% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 16.2% before costs and 15.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

If the fund is part of another product, such as an insurance product, the costs shown here do not include any additional costs you may incur.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge any entry fee.	0 USD
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.00% of the value of your investment per year. This is an estimate based on actual costs over the last year.	101 USD
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	2 USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	N/A
