# **Swiss Life Dynamic Elements Portfolio Global Equity**

## Investment strategy

The Global Equity portfolio offers investors a globally diversified investment in index or index-proximate investment funds. The objective of the portfolio is to achieve long-term capital growth. For this purpose the portfolio consists entirely of equity funds. The equity funds are exclusively ETFs (exchangetraded funds) or funds with institutional pricing, otherwise available only to institutional investors. The investment funds meet the quantitative and qualitative selection criteria of Swiss Life Asset Managers and are monitored on a regular basis. The portfolio is subject to annual rebalancing.

## Investment suitability

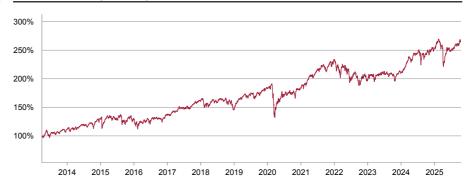

In addition to the return element with the fund portfolio described here, Dynamic Elements Uno/Duo/Junior Plan also comprises a collateral element. The investment strategy for Dynamic Elements is a function of the premium split selected between the collateral and return elements. The investment strategy of this portfolio, which is deployed in the return element, tolerates major value fluctuations. The Global Equity portfolio available in the return element of Dynamic Elements has the following characteristics:

- It may experience significant fluctuations
- · It is oriented to capital growth
- The equity exposure is 100%
- It is designed for a long-term investment
