## Pictet - Quest Europe Sustainable Equities

Site web Informations en matière  
de durabilité (SFDR)

20/10/2025

LEGAL ENTITY IDENTIFIER: 549300NPMY49SMN5GK24

Le présent document fournit les exigences en matière d'informations conformément à l'article 10 du Règlement (UE) 2019/2088 du Parlement Européen et du Conseil du 27 novembre 2019 sur la publication d'informations en matière de durabilité dans le secteur des services financiers (SFDR), pour les produits financiers visés à l'article 8 du Règlement.

## RÉSUMÉ

Ce fond:

---

Est conforme à l'article 8 du SFDR.

---

Prend en considération les risques en matière de durabilité. (1)

---

Promeut les caractéristiques environnementales ou sociales et cherche à atténuer les "Principales incidences négatives".

---

Applique des critères d'exclusion liés aux armes, aux combustibles fossiles, aux produits addictifs et aux entreprises qui violent les normes internationales. (2)

---

Respecte les bonnes pratiques en matière de gouvernance d'entreprise.

---

Mène un dialogue collaboratif et, lorsque cela s'avère pertinent, exerce des droits de vote.

---

Notes:

(1) Les risques en matière de durabilité comprennent la transition climatique, les risques physiques et autres risques environnementaux, les risques sociaux et les risques liés à la gouvernance.

(2) Pictet Asset Management conserve un pouvoir discrétionnaire absolu sur l'application des critères d'exclusion et se réserve le droit de s'écarter des informations de tiers, au cas par cas. Pour les stratégies passives, les exclusions sont mises en œuvre sur une base dite best effort, et pour celles qui suivent un indice ESG, les exclusions sont définies par le fournisseur de l'indice.

La décision d'investir dans le fonds promu doit tenir compte de toutes les caractéristiques ou de tous les objectifs de celui-ci, tels que décrits dans son prospectus.

Pour de plus amples informations sur la classification ESG, les risques en matière de durabilité et les exclusions, veuillez consulter la [Politique d'investissement responsable de Pictet Asset Management](#).

### 1. Sans objectif d'investissement durable

Le fonds promeut des caractéristiques environnementales ou sociales mais n'a pas pour objectif l'investissement durable. Le fonds vise à investir partiellement dans des titres finançant des activités économiques qui contribuent de manière substantielle aux objectifs environnementaux et/ou sociaux.

### 2. Caractéristiques environnementales ou sociales du produit financier

Le fonds adopte une stratégie best-in-class, en se concentrant sur les émetteurs présentant de faibles risques en matière de durabilité et en réduisant l'univers d'investissement d'au moins 20% par rapport à l'indice MSCI Europe. Il vise une intensité carbone inférieure à celle de son univers d'investissement et exclut les émetteurs qui violent gravement les normes internationales ou qui ont une incidence négative sur la société ou l'environnement. L'actionnariat actif se traduit par des droits de vote et un dialogue avec la direction sur les questions ESG importantes.

### 3. Stratégie d'investissement

Le gestionnaire d'investissement utilise une approche quantitative pour sélectionner des titres présentant des caractéristiques financières et durables supérieures, en privilégiant les émetteurs présentant de faibles risques en matière de durabilité. Le fonds évite les activités qui ont une incidence négative sur la société ou l'environnement, exerce ses droits de vote de manière méthodique et s'engage auprès des entreprises pour influencer positivement les pratiques ESG. La performance du fonds peut s'écarter sensiblement de celle de son indice de référence en raison du pouvoir discrétionnaire du gestionnaire d'investissement.

### 4. Proportion d'investissements

Au moins 80% des investissements du fonds s'alignent sur les caractéristiques E/S, avec au moins 40% alloués aux investissements durables. Les investissements restants soutiennent d'autres caractéristiques E/S.

#### **5. Contrôle des caractéristiques environnementales ou sociales**

Notre département Conformité surveille en permanence les éléments contraignants du fonds afin de veiller à ce qu'ils soient respectés tout au long du cycle de vie du fonds.

#### **6. Méthodes**

Le fonds utilise plusieurs indicateurs pour évaluer son impact ESG, dont le pourcentage d'exposition aux investissements durables, la réduction de l'univers d'investissement sur la base de facteurs ESG, les indicateurs PIN, l'exercice des droits de vote et l'engagement auprès des entreprises.

#### **7. Sources et traitement des données**

Pictet Asset Management utilise des données provenant de fournisseurs ESG spécialisés, complétées par une analyse interne. La qualité des données est assurée par des alertes automatisées et des révisions manuelles, les mises à jour quotidiennes alimentant les systèmes internes.

#### **8. Limites aux méthodes et aux données**

Bien que la couverture des données ESG s'étende, les limites sont notamment les données incomplètes fournies par les émetteurs. Nous remédions à ces limites en surveillant en permanence les nouvelles séries de données pertinentes potentielles des fournisseurs.

#### **9. Diligence raisonnable**

Les fournisseurs de données ESG sont soumis à une diligence raisonnable rigoureuse supervisée par le Comité des données ESG du Groupe Pictet et couvrant des sujets tels que la révision de leur modèle économique, de leur processus de recherche, de leur expertise technique, de la couverture des données, des mécanismes d'assurance qualité et de la prévention des conflits d'intérêts.

#### **10. Politiques d'engagement**

Nous menons un dialogue collaboratif (engagement) pour le compte de nos positions en actions et en dette longues uniquement et gérées. Nos activités en matière d'engagement combinent des discussions ciblées menées en interne, des initiatives de collaboration avec les investisseurs institutionnels et des services d'engagement de tiers.

#### **11. Indice de référence désigné**

Aucun indice ESG spécifique n'a été désigné.

**NO SUSTAINABLE INVESTMENT OBJECTIVE**

The fund promotes environmental or social characteristics but does not have as its objective sustainable investment.

The fund intends to partially invest in securities financing economic activities that substantially contribute to the environmental and/or social objectives.

The fund considers principal adverse impacts (PAIs) on sustainability factors through the exclusion of issuers associated with controversial conduct or activities. Exclusions allow the fund to remove economic activities and behaviours towards international norms that have high adverse impacts on society or the environment. How exclusions map to PAIs and their related indicators is set out in Pictet Asset Management's Responsible Investment policy.

The fund excludes issuers that are subject to high or severe controversies in areas such as human rights, labour standards, environmental protection and anti-corruption, or in breach of UN Global Compact Principles or OECD Guidelines for Multinational Enterprises.

The fund considers an investment sustainable if it does no significant harm to any E/S objective, which the investment team determines by applying exclusions. Exclusions allow the fund to remove economic activities and behaviours towards international norms that have high adverse impacts on society or the environment. Please refer to Pictet Asset Management's Responsible Investment policy for further details on excluded sectors and behaviours and exclusion thresholds.

**ENVIRONMENTAL OR SOCIAL CHARACTERISTICS OF THE FINANCIAL PRODUCT**

- **Best-in-class**

The fund seeks to invest in securities of issuers with low sustainability risks while avoiding those with high sustainability risks, reducing the investment universe by at least 20%. The MSCI Europe (EUR) is used to measure the universe reduction; however, no reference index has been designated for the purpose of attaining the environmental or social characteristics promoted by the fund.

- **Carbon intensity:**

The fund aims to have a lower carbon intensity than the investment universe.

- **Norms- and values-based exclusions:**

The fund excludes issuers that are in severe breach of international norms or have significant activities with adverse impacts on society or the environment.

- **Active ownership:**

The fund methodically exercises its voting rights. The fund may also engage with the management of companies on material ESG issues and may discontinue investment if progress proves unsatisfactory.

- **Objectives of the sustainable investments that the fund partially intends to make**

The fund partially invests in securities financing economic activities that substantially contribute to environmental or social objectives such as:

- Environmental
  - De-carbonisation

- Efficiency & Circularity
- Natural Capital Management
- Social
  - Healthy Life
  - Water, Sanitation & Housing
  - Education & Economic Empowerment
  - Security & Connectivity

## INVESTMENT STRATEGY

In actively managing the fund, the investment manager uses a quantitative approach to select securities that it believes offer superior financial and sustainable characteristics. The investment manager considers ESG factors a core element of its strategy by adopting a best in class approach which seeks to invest in securities of issuers with low sustainability risks while avoiding those with high sustainability risks, subject to good governance practices. Activities that adversely affect society or the environment are also avoided. Voting rights are methodically exercised and there may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy, SFDR product category Article 8. The performance of the fund is likely to be significantly different from that of the benchmark, because the investment manager has significant discretion to deviate from its securities and weightings.

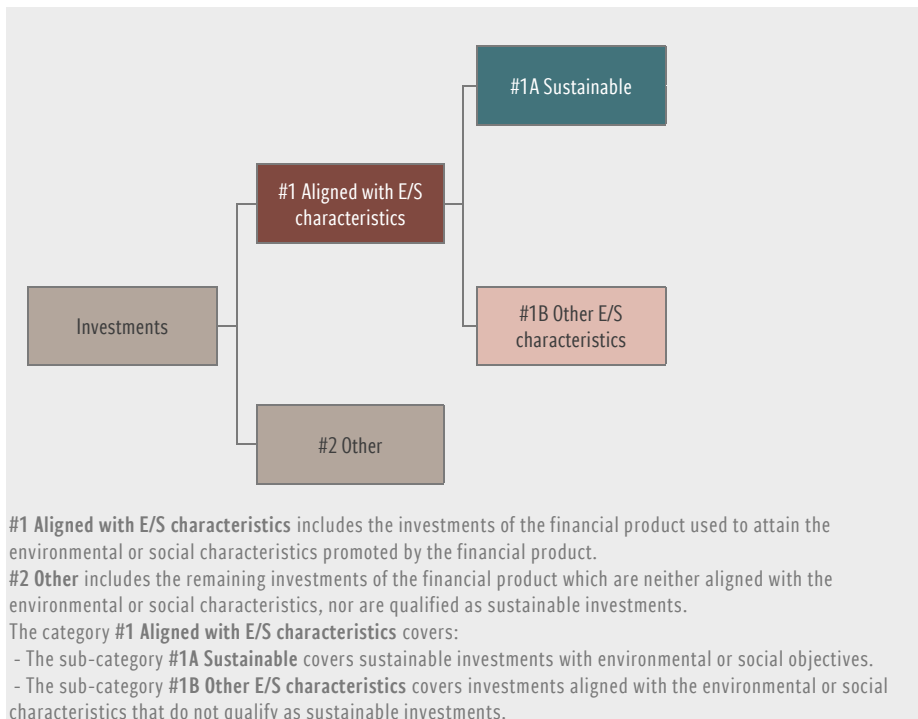

The fund's binding elements include:

- exclusion of issuers that:
  - are involved in the production of nuclear weapons in countries that are not signatories to the Treaty on the Non-Proliferation of Nuclear Weapons (NPT), and in the production of other controversial weapons
  - derive a significant portion of their revenue from activities detrimental to society or the environment such as thermal coal extraction. Please refer to Pictet Asset Management's Responsible Investment policy for further details on excluded activities and revenue thresholds.
  - severely violate the UN Global Compact principles on human rights, labour standards, environmental protection and anti-corruption
- the mandatory exclusions for EU Paris-aligned Benchmarks
- ESG criteria analysis of eligible securities that covers at least 90% of net assets or the number of issuers in the portfolio

The good governance practices criteria apply to issuers of all corporate investments of the fund. To determine whether a company meets minimum requirements for good governance practices under SFDR, Pictet Asset Management ensures that companies it invests in do not have severe controversies or UN Global Compact breaches that are linked to various topics including sound management, employee relations, remuneration of staff and tax compliance. How breaches to UNGC principles and severe controversies map to good governance practices is set out in Pictet Asset Management's Responsible Investment policy.

**PROPORTION OF INVESTMENTS**

The fund is at least 80% aligned with E/S characteristics (#1 Aligned with E/S characteristics) and up to 20% invested in Other (#2 Other). At least 40% are allocated to Sustainable investments (#1A Sustainable) and the remainder will be invested in investments aligned with other environmental and/or social characteristics (#1B Other E/S characteristics).

Pictet Asset Management uses a proprietary framework to define sustainable investments. Sustainable investments are calculated on a pass/fail basis including labelled bonds, general bonds from countries that reduce CO2 emissions or implement policies that may lead to meaningful improvement in reducing CO2 emissions, and securities from issuers with at least 20% combined exposure (as measured by revenue, EBIT, enterprise value or similar metrics) to economic activities that contribute to environmental or social objectives.

Please refer to Pictet Asset Management's Responsible Investment policy for further details on our Sustainable Investment Framework.

**MONITORING OF ENVIRONMENTAL OR SOCIAL CHARACTERISTICS**

Our Compliance department monitors on an ongoing basis the binding elements (referred to in the Investment strategy section) of the fund to ensure that these are met throughout the lifecycle of the fund.

**METHODOLOGIES FOR ENVIRONMENTAL OR SOCIAL CHARACTERISTICS**

Indicators the fund uses include:

- The percentage of the financial product's exposure to "sustainable investments" as defined in Article 2 (17) of SFDR
- Reduction of the investment universe based on ESG factors

- Principal Adverse Impact (PAI) indicators such as exposure to issuers that are in severe breach of international norms or have significant activities with adverse E/S impacts on society or the environment
- The percentage of eligible company meetings where voting rights were exercised
- Engagement with companies

## DATA SOURCES AND PROCESSING

Pictet Asset Management has selected a range of specialist providers for ESG data to support our firm-wide ESG integration and active ownership activities. Data received from external providers may be complemented by internal research and analysis provided by our Investment teams and ESG specialists.

Pictet Asset Management's main ESG data providers can be found in our Website by following this [link](#).

### What are the measures taken to ensure data quality?

Quality issues trigger automated alerts, which are followed by manual reviews from our data and ESG analysts/specialists, and where necessary, by engagements with third-party ESG data providers. Additionally, we perform momentum analysis on different ESG data to better identify risks and opportunities.

### How is data processed?

ESG data are updated daily in our internal data warehouse and are made available to our investments teams through various systems, such as our internal ESG Scorecard, Portfolio Management System, and Tableau dashboards.

### What proportion of data is estimated?

Although we prioritise reported data over estimated data, we do rely on estimations to some extent, where reported data are not available. Data reported by companies and regulatory authorities are prioritised over estimated data from external providers and ranked higher in terms of reliability for investment and active ownership activities.

The proportion of estimated data varies depending on the ESG indicator. For example, for GHG emissions scope 1 and 2, around 80% of the data is reported, while the majority of scope 3 emissions are estimated.

## LIMITATIONS TO METHODOLOGIES AND DATA

### Any limitations to the methodologies

Key limitations to our methodologies may include a lack of data coverage. Our methodologies are informed by reliable sources gathered from diverse reputable third-party research providers that are experts in their areas.

In cases where the information from third-party providers is deemed incorrect or incomplete, we retain the right to engage with them or to deviate, on a case-by-case basis.

### How such limitations do not affect the objective of the fund

ESG data availability is continually improving, and we are leveraging more and more on our data using information from different providers. However, certain data may not be available for all issuers in the fund or benchmark, which means that ESG indicators provided at the portfolio level may not be fully representative. Therefore, it is important to consider coverage ratios when interpreting the levels of ESG indicators. At the

portfolio and index level, an ESG indicator is considered significant if we have coverage on more than 50% of eligible assets (in-scope instruments).

#### **Actions taken to address such limitations**

We address such limitations on constantly monitoring potential new relevant data set from providers.

## **DUE DILIGENCE**

Service providers are subject to rigorous due diligence supervised by the Pictet Group ESG Data Committee and covering topics such as review of their business model, research process, technical expertise, data coverage, quality assurance mechanisms, and prevention of conflicts of interests. In addition to external ESG data, the Committee approves and oversees the development of in-house ESG data infrastructure and the annual ESG data budget.

The existing list of ESG Data providers is subject on an ongoing revision for data quality, coverage and other attributes. As a consequence, if the outcomes of the due diligence are not satisfactory and we face repetitive data quality issues we can close the contract we have in place with them.

More information about the external data sources used is available upon request.

Our due diligence process of issuers covers the following points:

- The clarity and robustness of the issuer's long-term strategy.
- The functioning and caliber of governance structures and effective leadership.
- The financial strength and performance of issuers and the fair valuation of underlying securities.
- Sustainability risks & opportunities and adverse impacts of potential investments on society and/or the environment.

## **ENGAGEMENT POLICIES**

We consider it our fiduciary duty to engage selected corporate issuers in order to positively influence a company's ESG performance and to protect or enhance the value of our clients' investments. We press management to adopt appropriate policies, practices and disclosure in line with established best practice but focus on those that lag behind or where accidents or events bring to light structural weaknesses in their governance and/or management of environmental and social issues. Interaction with issuers take the form of one-to-one discussions, shareholder/bondholder meetings, investor roadshows and/or conference calls. The objectives of these interactions are to assess an organization, monitor that their strategy is being implemented in line with our expectations and ensure that issuers are on track to meet their goals and objectives.

We engage on behalf of our long only, managed equity and debt holdings. Our engagement activities include a combination of targeted in-house-led discussions, collaborative institutional investor initiatives, and third-party engagement services.

Collaborative initiatives we participate in include Ceres Valuing Water Finance, Nature Action 100 and FAIRR.

Engagement targets may be identified independently by investment teams, or as part of our Group Engagement Focus program, a group-level engagement initiative that focuses on issues such as climate change, nature, long-termism and breaches of global norms.

Our [Pictet Climate Action Plan](#), which includes our commitment to net zero by 2050 as well as interim science-based targets, also drives some of our engagement activity as we use active ownership to make progress against our climate targets. More detailed information on engagement and proxy-voting policies activities can be found in [Pictet Asset Management's Responsible Investment Report](#) and [Responsible Investment Policy](#).
